01 | Executive Summary

The Shriram Mutual Fund AI-Enabled Two-Phase SIP Onboarding Framework is a strategic digital initiative designed to dramatically improve employee participation in SIP investment products. By intelligently separating **investment intent capture** from **operational onboarding**, the framework eliminates the psychological friction that causes first-time investors to abandon traditional onboarding journeys.

The model operates in two carefully orchestrated phases: Phase 1 captures consent and investment intent through a frictionless one-click interaction, while Phase 2 guides the employee through goal mapping, KYC completion, and SIP activation in progressive, AI-assisted micro-steps. Together, these phases deliver a customer experience that is fast, personalized, and compliant — without ever feeling operationally heavy.

02 | Strategic Context & Objectives

Problem Statement

- Traditional SIP onboarding requires 15–25 form fields before capturing first intent
- Long KYC flows lead to 60–70% drop-off rates among first-time investors
- Employees in corporate programs lack personalized guidance, reducing conversions
- Manual, paper-based or multi-screen journeys are not scalable across large employee bases
- No intelligent segmentation or AI-driven nudging exists in legacy platforms

Primary Objectives

- Maximize SIP opt-in rates through instant, one-click engagement
- Reduce onboarding drop-off by breaking the journey into progressive micro-steps
- Deploy AI personalization to match funds and SIP amounts to employee profiles
- Scale corporate employee engagement programs without increasing operational overhead
- Establish Shriram Mutual Fund as a customer-centric, digitally intelligent brand

03 | Phase 1 – One-Click SIP Consent & Interest Capture

PHASE 1

Instant Intent Capture — Frictionless Engagement

Phase Purpose

Phase 1 is engineered to achieve immediate customer engagement with the absolute minimum effort required from the employee. Instead of confronting users with lengthy onboarding flows, the journey begins with a lightweight, single-click investment intent capture mechanism that records consent and interest without redirecting users into KYC or detailed forms.

Distribution Channels

- Employee Portal — embedded journey widget on the intranet
- WhatsApp — personalized deep-link message with one-tap CTA
- SMS — short-code link with pre-filled employee context
- Email — HTML card with embedded 'Start SIP' button
- HRMS Platform — native integration within payroll/benefits section
- Mobile Application — push notification + in-app fund card

Curated Fund Display — Three Products Only

To avoid decision paralysis, Phase 1 presents employees with **exactly three curated Shriram Mutual Fund products**, each accompanied by an AI-generated plain-language explanation:

Fund Name	Category	Risk Level	Investor Persona
Shriram Multi Asset Fund	Multi Asset Allocation	Moderate	Balanced long-term wealth
Shriram ELSS Fund	Equity Linked Savings	High	Tax-saving + growth
Shriram Flexi Cap Fund	Flexicap	High	Dynamic equity exposure

Fund Card Elements

- AI-generated simplified fund explanation (plain language, under 30 words)
- Risk category badge (Low / Moderate / High / Very High)
- Suggested investor persona matched to employee profile
- Indicative wealth creation potential (5Y/10Y indicative projection)
- "Start SIP in One Click" CTA button — primary conversion action

Key Experience Principle

- Employee expresses investment intent in a SINGLE CLICK
- No KYC, no detailed form — just consent capture
- Works across all devices (mobile-first design)
- Personalized fund ranking based on AI profile analysis

AI Capabilities in Phase 1

Personalization Layer	Optimization Layer
• Fund recommendation ranking by employee profile	• AI-generated multilingual communication
• Personalized SIP amount suggestions	• Predictive conversion scoring

• Smart nudge timing (best engagement hours)	• Dynamic CTA optimization by behaviour
--	---

PHASE 2

Progressive Onboarding — Guided & Compliant Activation

Phase Purpose

Having captured investment intent in Phase 1, Phase 2 completes the regulatory and investment journey through a carefully sequenced, AI-guided flow. The customer is re-engaged through contextual nudges, and the onboarding is decomposed into **micro-steps** that feel natural and progressive rather than operationally burdensome.

Step 1 — Financial Goal Selection

- Wealth Creation — long-term compounding with equity exposure
- Tax Saving — ELSS-linked 80C deductions up to ₹1.5L
- Emergency Corpus — liquid buffer for unforeseen events
- Child Education — goal-based SIP with target corpus calculator
- Retirement Planning — long-horizon wealth accumulation

Step 2 — AI-Assisted SIP Recommendation

- AI-suggested SIP amount based on income bracket and goal
- Recommended SIP tenure aligned to goal horizon
- Fund suitability mapping (risk profile vs. selected goal)
- Indicative maturity projections with visual wealth chart

Step 3 — Digital KYC Completion

KYC Component	Technology Used	Status
PAN Verification	NSDL API + AI extraction	Instant
Aadhaar Validation	UIDAI OTP-based e-KYC	Real-time
Document Upload	OCR + AI field extraction	Auto-filled
Face Match / Liveness	AI-powered biometric check	Seamless
Video KYC (if needed)	Assisted video call flow	Optional

Step 4 — Mandate Setup & SIP Activation

- e-NACH registration via net banking or debit card
- UPI Autopay setup as alternative mandate mechanism
- SIP start date selection aligned to salary credit date
- Instant confirmation with SIP schedule summary
- Welcome kit delivery and portfolio onboarding notification

Key Experience Principle

- Every step is AI-guided — not compliance-driven
- Smart prefill reduces manual data entry by 70%+
- Conversational support bot available at every step
- Progress saved automatically — resume anytime

05 | AI Opportunities Across Both Phases

AI Capability	Phase	Business Value
Fund Recommendation Engine	Phase 1	Higher relevance → higher opt-in
SIP Amount Personalization	Phase 1 & 2	Reduces form abandonment
Smart Nudge Timing	Phase 1	Improves open and click rates
Multilingual AI Content	Phase 1	Broader employee reach
Predictive Conversion Scoring	Phase 1	Prioritize high-intent leads
OCR Document Intelligence	Phase 2	Reduces KYC friction
Smart Form Prefill	Phase 2	Faster completion rates
Fraud & Anomaly Detection	Phase 2	Reduces compliance risk
Conversational KYC Bot	Phase 2	Lower human support dependency
Personalized Investment Coaching	Phase 2	Improves long-term retention
KYC Issue Prediction	Phase 2	Pre-empts rejection before submission

06 | Fund Product Overview

	Shriram Multi Asset Fund	Shriram ELSS Fund	Shriram Flexi Cap Fund
Category	Multi Asset Allocation	ELSS / Tax Saving	Flexicap Fund
	Moderate	Very High	Very High
Tax Benefit	No	Yes (Sec 80C)	No
	None	3 Years	None
Min SIP	■500/month	■500/month	■500/month
	Balanced investors	Tax savers	Growth seekers
Investment Horizon	3–5 Years	5+ Years	5+ Years

07 | Expected Business Impact

Phase 1 Impact Metrics

Metric	Expected Outcome
SIP Opt-in Conversion	30–50% improvement over traditional flows via one-click intent capture
Onboarding Drop-off Reduction	60%+ reduction in first-step abandonment through frictionless entry
Campaign Scalability	10x scale possible via automated digital channel distribution
Time to First Intent	Reduced from 8–12 minutes (legacy) to under 60 seconds
Employee Engagement Score	Measurable uplift in participation rate across corporate programs

Phase 2 Impact Metrics

Metric	Expected Outcome
Onboarding Completion Rate	Target: 75%+ vs. industry average of 35–40%
KYC Abandonment Rate	60% reduction via smart prefill and step-by-step guidance
Operational Dependency	40–60% reduction through AI automation and OCR
Activation Turnaround Time	Reduced from 3–5 days to same-day digital activation
Customer Satisfaction (CSAT)	Expected NPS uplift of 20–30 points vs. legacy journey

08 | Implementation Roadmap

Phase	Milestone	Duration	Owner
Discovery	Requirements, UX research, channel mapping	2 Weeks	Product + UX
Phase 1 Build	Fund card UI, one-click flow, AI recommendation engine	4 Weeks	Tech + AI
Phase 1 Pilot	Limited rollout to 1 corporate client (500 employees)	2 Weeks	Business
Phase 2 Build	Goal flow, KYC integration, e-NACH, mandate setup	6 Weeks	Tech + Ops
AI Integration	OCR, prefill, nudge engine, conversational bot	4 Weeks	AI/ML Team
UAT & Compliance	Regulatory review, security testing, data privacy	3 Weeks	Compliance
Full Launch	Pan-India corporate employee program rollout	2 Weeks	All Teams

09 | Strategic Advantage & Conclusion

Why the Two-Phase Model Works

Traditional investment onboarding conflates **intent capture** with **compliance completion** — forcing first-time investors to navigate regulatory complexity before they have emotionally committed to the investment. The two-phase model strategically decouples these distinct psychological and operational moments:

Traditional Single-Phase	Proposed Two-Phase Model
Intent + KYC in one long session	Intent captured first, KYC deferred
High cognitive load from first interaction	Low-friction entry, progressive depth
60–70% first-step drop-off	One-click consent maximizes early conversion
No personalization	AI-driven fund and amount recommendations
Generic communication	Multilingual, channel-specific AI messaging
Manual, agent-assisted	Fully digital, self-serve with AI support

Ideal Use Cases

- Corporate employee engagement and payroll-linked SIP programs
- Large-scale B2B2C distribution partnerships with employers
- First-time mutual fund investor acquisition campaigns
- Assisted digital journeys via RM or distributor-led funnels
- HRMS-integrated financial wellness benefit programs

Conclusion

The AI-enabled Two-Phase One-Click SIP Onboarding Framework positions Shriram Mutual Fund as a forward-thinking, customer-obsessed investment platform that understands the psychology of financial decision-making. By prioritizing ease of entry, progressive onboarding, and AI-assisted personalization at every step, the framework will materially improve employee participation rates, onboarding efficiency, and long-term SIP retention.

This is not merely a UX improvement — it is a strategic repositioning of Shriram Mutual Fund at the intersection of technology, behavioral finance, and customer-centric design. The framework is scalable, regulator-compliant, and designed to deliver measurable ROI from the first corporate pilot.
